# AAA for AAI (1)

# AAA for AAI (2)

- **Authentication**  
Allow access to critical resources using 2-factor authentication (stronger authentication)
- **Assurance Levels**  
Distinguish user groups with quality level of Identity Management and authentication
- **Auditing**  
Sustain trust with documentation and rating of IdM processes
- **Accounting**  
Allow controlled access to resources in measuring and reporting on the usage of resources

# AAA for AAI (3)

# AAA for AAI, Scope

- **Scope of AAA projects**

Extension of current AAI functionality, e.g.

- Auditing
- Assurance Levels
- Authentication (Stronger Authentication)
- Accounting (Monitoring and Usage Statistics)
- Access to non-web resources

- **Not in scope**

Operation of the AAI infrastructure (including software upgrades)
