- > UniPrint
- > Q & A

Overview

- > SWITCH AAA Project
 - Started end 2007 / begin 2008
 - Two goals:
 - Provide prototype for accounting in SWITCH-AAI
 - AAI-enabled printing at the university of Bern
- > Currently one person working on it
- > Large interest in the community
- > Personal contacts with other institutions/projects

Accounting Prototype Overview / Status

> Goal

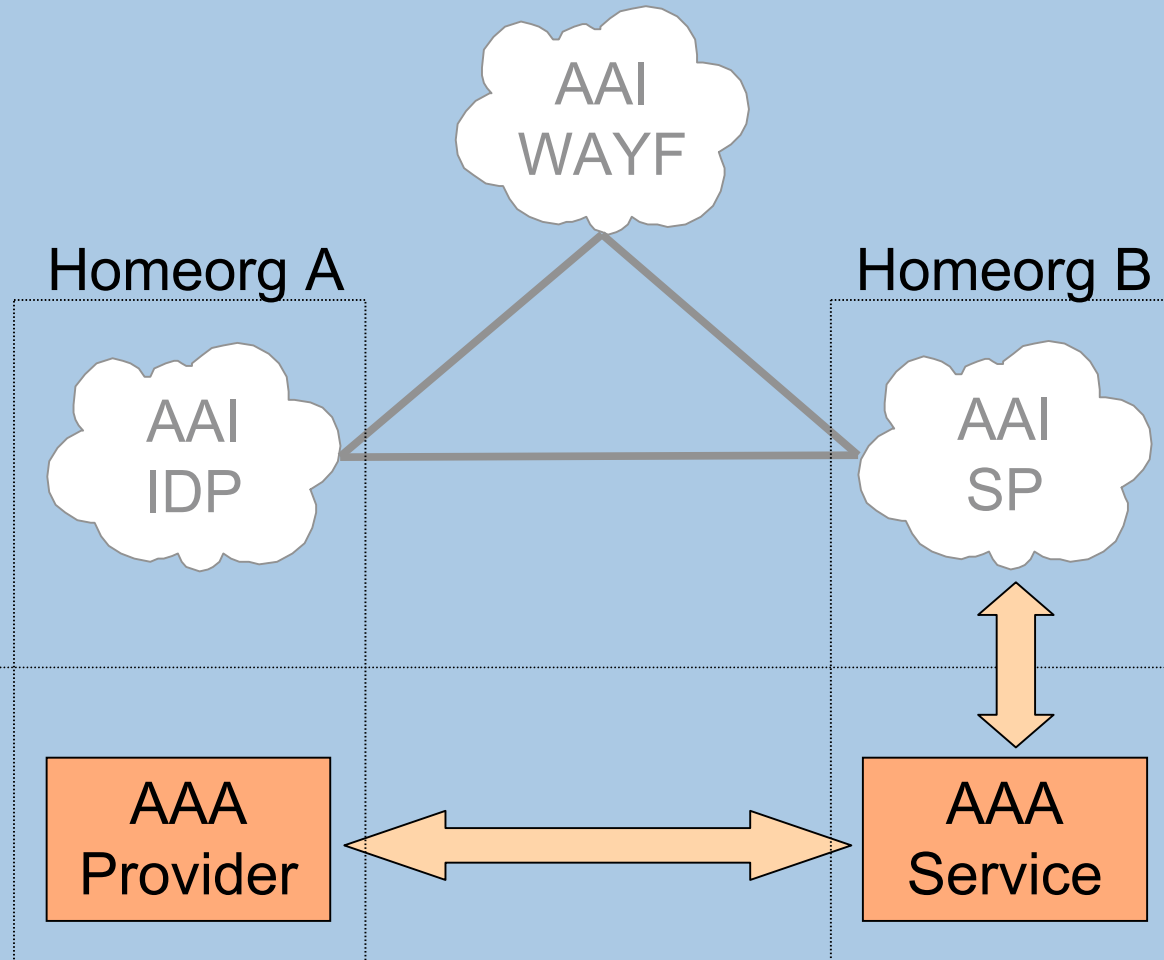

- Build a prototype for experimenting with accounting in the SWITCH AAI federation
- Testdrive prototype together with the new printing solutions at the university of Bern
- Provide a minimal working implementation for others to work on / derive their own ideas

> Current status

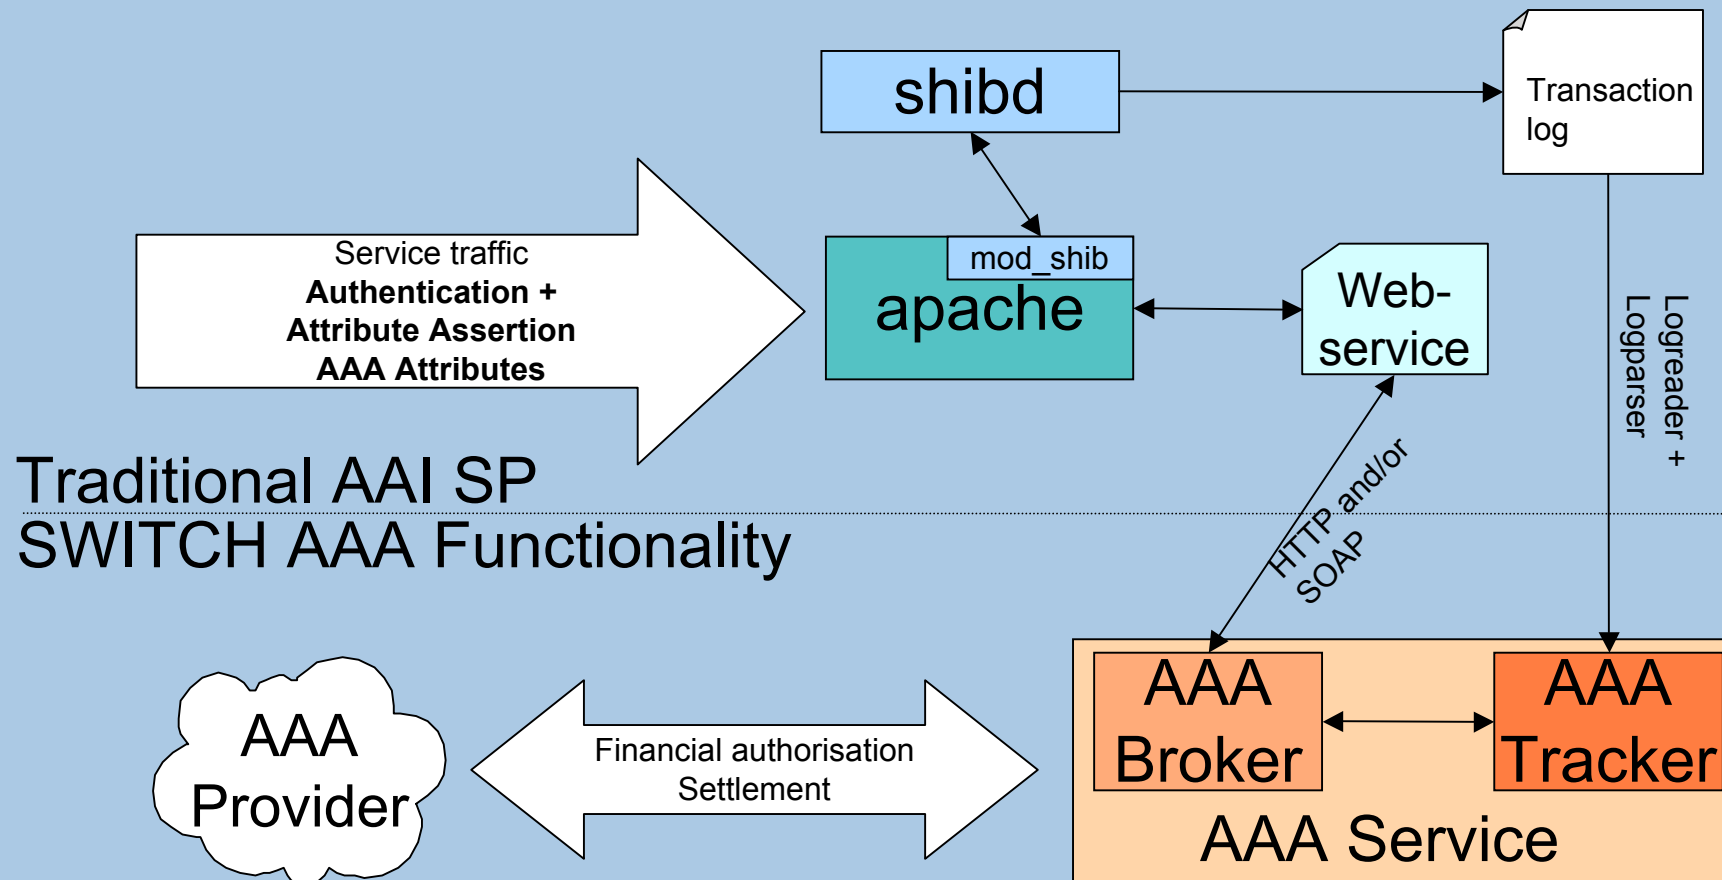

- Development in progress since quite a while
- First, basic implementation expected end Q1/2009 or in the first half of Q2/2009
- Some delay due to increased workload on UniPrint

Accounting Prototype Components Overview

Traditional AAI
Federation

Accounting Prototype Components – AAA Service Side

UniPrint

- > Goal
 - Provide AAI-enabled printing at the university of Bern
 - Integrate with accounting prototype, conduct experiments
- > How...?
 - Web-based printing-service by third party
 - Integrated with MFD's and Polyright studentcard
 - Shibbolize it!
- > Status
 - Major delays caused by third parties, but not related to AAI
 - Apparently serious troubles understanding and implementing Shibboleth-login on their side
 - Sun starts shining again: promising steps forward as of january 2009
